

I commute from Baltimore to Washington, D.C. daily and find it VERY helpful to receive traffic information ON DEMAND from XM as opposed to on the 8's or whenever the traditional stations get around to delivering VITAL information. The information is more complete and allows me to decide on the best route home. I have both the Washington and Baltimore channels set with presets and flip between the two to get all the information I need to make an informed decision. I usually take the BW Parkway home everyday, but on occasion I will take Route 50 to Route 97 when the Parkway is congested. I carpool with a coworker in an effort to relieve congestion on the roads and any information I can get my ears on in a timely maner is beneficial. PLEASE PLEASE do NOT restrict XM's ability to deliver this valuable content. Since this is a pay for service system it should have effect on those who chose not to subscribe to it and the traffic reporting by traditional stations should be able to continue.
